

Barbara Ruiz

FRONTEND DEVELOPER

barbararui063@gmail.com | [Portfolio](#) | [LinkedIn](#)

About me

I am a Frontend Developer with a background in Industrial Design, which has given me a unique perspective on user-centered design. I always think about how people will use my products and the experiences I want them to have. I discovered my passion for web development during the Henry bootcamp, where I learned the technical foundations I now apply to my projects. This experience motivated me to redirect my studies toward frontend development, deepening my knowledge in programming and applied design.

Projects

Frontend Developer

Opengrano - Web3 Platform | Project open source at TheBadge June 2024 - March 2025

- Designed and developed reusable frontend components using React, Next.js, TailwindCSS, and TypeScript.
- Configured translations for multiple languages with i18n.
- Designed the web interface in Figma and implemented it in the frontend, ensuring visual consistency.

Frontend Developer

FisioAhora - Foo Talent Group February 2024 - March 2024

- Designed and built attractive and functional frontend components and pages using React, TailwindCSS, and JavaScript.
- Developed search functionality with filters using Node.js.
- Implemented and configured the application deployment.
